# Largest Cargo Ever Landed At Honolulu

SIBERIA ARRIVES THIS MORNING FROM THE ORIENT WITH NEARLY 2,700 TONS OF FREIGHT FOR HONOLULU—IS CROWDED WITH THROUGH PASSENGERS—PHILIPPINE COMMISSIONERS ARE ABOARD.

With probably the largest crowd of through passengers in her history, the S. S. Siberia arrived this morning from the Orient, en route to San Francisco. The vessel left Yokohama May 11. She experienced good weather. Nothing of particular interest transpired during the voyage. The steamer F. H. Leggett, en route to Midway, was sighted several days ago.

The Siberia is crowded with freight. She brought the biggest cargo ever landed at Honolulu. She has a total of 22,548 packages of freight. The Honolulu cargo amounts to 2,653 tons. She has 62,163 bags of rice, 1,016 mats of rice, 4,836 tubs of soil, 3,138 bales of gunny sacks for Honolulu. As treasure for San Francisco the vessel has \$2,000,000.

An especially interesting part of the cargo is the picture of the Empress Dowager which is being taken to the St. Louis Exposition. This picture and frame occupies 835 cubic feet and is insured for \$50,000 gold.

Aboard the vessel are the members of the special Philippines Commission to the St. Louis Exposition. They are representatives from the various districts of the islands. They are accompanied by Captain T. Hardmann and A. W. Ferguson.

There are also aboard the vessel 46 Japanese geisha girls. Two nights before the vessel got into Honolulu the geisha gave an entertainment aboard. Their costumes were gorgeous. The geishas are going to St. Louis.

Senator Cecil Brown, wife, and Miss Dickson returned from a tour of the Orient.

Chun Wing Sien Afong and Afong Chun Tong arrived by the vessel. Tony Afong is paying his first visit to Honolulu in years. The elder Afong remained at his home near Makao, China. Tony Afong brought his son with him on the vessel today.

Major S. G. Radcliff, of the 33rd Burmah Regiment, is going home on leave, after being stationed at Hong Kong for some time.

Sir Frederick Treves, the private surgeon to His Majesty King Edward VII, is making a tour of the world, accompanied by Laoy Treves. Sir Frederick operated on His Majesty when the King had appendicitis, and the coronation had to be postponed about two years ago.

B. C. Colver and wife are through passengers. He went out to the Orient to represent the Scripps-McRae syndicate of newspapers during the war. After remaining bottled indefinitely in Tokio, he decided not to waste further time so is returning home. Mr. and Mrs. Colver will be the guests of Mrs. Kelly during the visit of the Siberia in port.

Dr. C. B. Hager is a missionary at Swatow.

G. Poncin is the manager of a wealthy estate of Washington. He is to stop over at Honolulu, unless advised by cable that his presence is necessary at home.

J. H. Lewis is a steamship man of Hong Kong. His company owns the S. S. Haimon which was chartered by the London Times as a dispatch boat. The Haimon was in Nagasaki when the Siberia was there. The Russian authorities ordered the Haimon away from Port Arthur and she has since been idle.

Captain Johnson is a shipping man of the Orient.

O. Sutro is a Manila attorney who is going to San Francisco on a visit.

His Excellency Shen Nang Hoo, accompanied by his interpreter Chun Chiu Tung, is en route to St. Louis. Shen is in charge of the Empress Dowager's picture which is aboard the Siberia. The picture is to be exhibited at the exposition.

The Siberia is scheduled to sail at noon tomorrow for San Francisco from the Hackfeld wharf.

# Wilke Refrigerators....

MERIT THE SERIOUS ATTENTION OF EVERY CAREFUL HOUSEWIFE.

The safe, economical and healthful preservation of food is quite as important as the food itself. Fresh, sweet and clean foods should not be submitted to the care of soggy, decaying wood and corroding metal, nor surrounded with dank, dead air; yet that persistent odor in the ordinary refrigerator is proof positive of corruption.

WILKE REFRIGERATORS are lined with either white glazed tile or half-inch plate glass; internal fixtures are all removal. Materials are absolutely non-corrosive, construction is air-tight, and there is a constant circulation of cold, dry air in every cubic inch of the provision chambers.
